

# NOISE & VIBRATION INDUSTRIAL HYGIENE SOLUTIONS

NOISE DOSIMETERS, HUMAN VIBRATION METERS, AND SOUND LEVEL METERS

# INDUSTRIAL NOISE ASSESSMENT

Industrial Hygienists and safety professional responsible for protecting workers from dangerous levels of noise in the workplace often need to map sound levels in key parts of an industrial environment or throughout an entire plant. Sound maps — (often called sound surveys, noise surveys, or occupational noise surveys) — give health and safety professionals important information to begin the process of reducing worker noise exposure.

Task-based or job-based noise measurements are another component of industrial acoustics – the noise to which a worker is exposed in a given task is measured, and then a formula is used to calculate the overall noise exposure for the workday. An accurate, easy-to-use, IEC and ANSI compliant sound level meter is key to compiling useful sound level information. Octave bands provide information that can help identify noise source and select appropriate hearing protection.

# SPARTAN™ SOUND LEVEL METER

SERIES 821

Spartan Sound Level Meter is an ideal tool for workplace noise exposure assessment and plant noise surveys. Fully compliant with IEC and ANSI standards for Class 1 or Class 2 sound level meters, Spartan supports ISO 9612:2009 measurement strategies for task or job-based measurements. Included software offers data visualization and streamlined results reporting.

- Large, responsive touch display
- Long battery life up to 40 hours
- Built-in dosimetry tools
- Automatic data download via Bluetooth or USB options
- Flexible powering options, including wireless charging
- Optional 1/1 and 1/3 octave band analysis available
- Ready to measure in seconds with quick boot time
- Included software offers data analysis and reporting

# PERSONAL NOISE **EXPOSURE**

Industrial Hygienists, EHS Consultants, and Safety Managers know that complying with noise exposure limits protects workers from permanent noise-induced hearing loss. Understanding actual noise levels experienced by individuals in the workplace is key to complying with guidelines established by OSHA, ISO, and other global directives. One way to determine whether an individual's noise exposure is within acceptable limits is to measure personal noise exposure with a noise dosimeter that meets IEC and ANSI noise dosimetry standards and provides exposure levels in an easy-to-understand format. Knowledge of a worker's daily noise exposure is critical information in mitigation of worker hearing loss risk, deployment of hearing conservation programs and engineering noise controls.

## SPARTAN™ NOISE DOSIMETER

MODEL 730

With Spartan, control test setup, timers, and measurements for up to four virtual dosimeters on a single device wirelessly via the easy-to-read display and on-device navigation. For greater efficiency, perform these tasks wirelessly via low-energy Bluetooth from a PC or via the exclusive mobile app, LD Atlas™. Spartan facilitates faster, simpler, consistent operation designed to save time and money.

With LD Atlas, all essential tasks, including viewing real-time exposure data, exceedances, battery life, and measurement metrics, can be completed directly from your iOS® or Android® device. Monitor devices free from the worry of interfering with the work routine of the person being measured. Generate reports, including the full data file, from the mobile interface before sharing via email. Spartan Noise Dosimeters are configured with built-in wireless charging pads in a robust travel case and available in 1-, 3-, 5-, and 10-packs.

- Full control and live monitoring via LD Atlas app
- Programmable (on/off) LED alarm for exceedances or actions
- Built-in bump detection and motion detection
- Voice-to-text notations with LD Atlas app
- Optional Event Sound Recording (730-ESR)
- Optional 1/1 Octave Band filters (730-OB1)
- Optional Bluetooth disabling (730-NBT)

# SPARTAN™ INTRINSICALLY SAFE NOISE DOSIMETER

MODEL 730IS

- All of the benefits of Spartan in an intrinsically safe design
- ATEX, MSHA, UL 913, IECEX, FCC, UKCA, CAN/CSA C22.2, ANZEx approved

# PERSONAL VIBRATION **EXPOSURE**

Excessive exposure to vibration, whether through the whole body or confined to the hand and arm, has wide-ranging, harmful effects. For Industrial Hygienists, measuring a worker's exposure to vibration is key to avoiding vibration-related injury and illness. If measured vibration values are higher than action values specified in national and international standards, workers may be at a significant risk of injury. Low back and neck pain, vestibular issues, and hand-arm vibration syndrome are all serious consequences of human body vibration exposure. Human vibration measurement tools with built-in metrics linked to standards assist safety professionals in understanding risk and making smart decisions about exposure risks and actions or deployment of administrative or engineering controls.

### **HUMAN VIBRATION METER**

MODEL HVM200

The HVM200 is a small, rugged, 3 channel human vibration meter with built-in Wi-Fi, designed to measure hand-arm, whole body, and general vibration. It includes the metrics and frequency weightings needed to measure human vibration. The measurement filters meet the requirements of ISO 8041:2017 and are designed to measure per ISO 2631-1, -2, & -5 and ISO 5349 in support of the American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Values (TLVs), Vibration at Work Regulations 2005, and the directive 2002/44/EC. This makes the HVM200 an ideal choice to demonstrate compliance with human vibration requirements and regulations worldwide.

- Designed for hand-arm, whole body, and general vibration measurements
- Control and view data from LD Atlas mobile app
- Meets ISO criteria and EU directives
- Ergonomically designed mounting adaptors and application optimized ICP® accelerometers
- USB 2.0 and Wi-Fi
- Removable Micro SD Memory Card
- Replaceable Lithium Battery

FOR SPARTAN & HVM200

Install LD Atlas on your phone or tablet - available for both iOS and Android - and connect to your Spartan Sound Level Meter Series 821, Spartan Noise Dosimeter Series 730 and Human Vibration Meter Model HVM200. Use LD Atlas to easily check on the status of your meter, make setup changes for a new measurement, analyze data, listen to recorded audio files, and even create and share PDF reports.
