

MODEL S W W - D A T A S V C

DATA SERVICE

- Public access to noise data
- Real time levels on a map
- Cloud based data collection and management
- Report generation
- Browser-based data availability and analysis
- Mobile-friendly

TYPICAL APPLICATIONS

- Environmental noise
- City noise
- Construction noise
- Monitoring noisy venues

INTERNET NOISE MONITORING

Data Service provides both public access to noise levels and easy access to in-depth historical noise data and reports. Data Service is a cloud-based service that collects data from Larson Davis noise monitors and presents the information in a format accessible and appropriate for all of the stakeholders.

Data Service is organized into three primary functional groups:

- **Live Data** - Ideal for the public or others who need current or recent noise level. The information is presented on a map with color coded levels and simple selections, so it can be used by anyone.
- **Noise Analyzer** - Provides customizable queries of historical noise data that can be viewed graphically or in tabular form. Using the Noise Analyzer, data can be reviewed online or exported for advanced analysis.
- **Report Module** - Makes viewing noise monitor data and creating pdf reports easy.

SPECIFICATIONS	
Supported Meters	831C-based Systems NMS044 NMS045
Number of Noise Monitoring Sites	1 to many
Number of Users	Public – unlimited Administrators - 10
Noise Monitor Communication	LAN, WiFi, or Cellular
Collection of Noise Monitor Data	Provided automatically
Integrated Weather Data	Using SEN031 or SEN032
Data Storage Location	Cloud

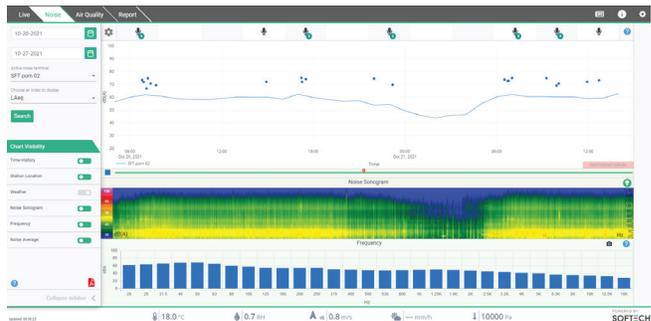

SUBSCRIPTION OPTIONS	
Monthly	SWW-DATASVC
Six Month Prepaid	SWW-DATASVC-6MO
Annual Prepaid	SWW-DATASVC-12MO

Public access to map-based noise information

Daily average noise reports

Frequency spectrum plot

3425 Walden Avenue, Depew, NY 14043 USA
